Summary

Full-stack developer with experience in building robust, scalable web solutions. Proficient in technologies like **Next.js, React.js, Node.js, Express.js, MongoDB, PostgreSQL, Redis, TypeScript, and Tailwind CSS**. Committed to delivering high-quality solutions through clean architecture, performance optimization, and collaboration in cross-functional teams.

Skills

Node.js • Express.js • Hono.js • Redis • MongoDB • PostgreSQL • MySQL • Prisma • BullMQ • React.js • Next.js • Tailwind CSS • JavaScript • TypeScript • Puppeteer • Langchain.js • Docker • Nginx • GitHub Actions • WebSockets • Problem Solving • System Design

Projects

Sleek AI — AI Chat Platform

Dec 2025 – Mar 2026 • 4 mo

Technologies: Hono.js • LangChain.js • PostgreSQL • BullMQ • Pinecone

- Built a full-stack AI chat platform managing multi-model LLM pipelines and tool execution with LangChain.js.
- Built a long-term memory pipeline using LangChain.js to persist conversation history and enable context-aware AI responses.
- Implemented file processing with BullMQ workers, enabling scalable background task handling.
- Integrated Clerk for secure authentication and used LangSmith to monitor AI pipeline performance..

CronJob Scheduler

Jul 2025 – Oct 2025 • 3 mo

Technologies: Agenda.js, QStash, Redux Toolkit, Docker, Zod

- Built a scalable cron job scheduler using Agenda.js, enabling users to create, manage, and monitor scheduled tasks efficiently.
- Orchestrated CI/CD with Docker and Watchtower; enforced system monitoring using Grafana and Prometheus.
- Contributed 100+ commits on GitHub, demonstrating consistent development and iterative improvements.
- Leveraged Redis for efficient caching and developed a PWA for consistent performance on all devices.

UniRide – Ride Pooling Website

Jan 2025 – Feb 2025 • 1 mo

Team: 3 members

Technologies: Node.js • MongoDB • Socket.IO • Tailwind CSS • EJS

- Implemented backend APIs and real-time WebSocket communication with Node.js, enabling seamless student ride sharing.
- Streamlined ride discovery, helping students share rides efficiently and reducing campus transport issues.
- Engineered backend storage with MongoDB and designed a responsive UI using Tailwind CSS.
- Collaborated with team members to divide tasks, review code, and deliver the project within the hackathon timeline.

Education

Bachelor's in Software Engineering

Dec 2022 – Dec 2026 • 4 yrs

Mehran University of Engineering and Technology

CGPA: 3.74/4.00

Jamshoro, Pakistan

- Focus: Software Engineering, Web Development, Database Systems, AI, System Design.
- Developed web applications and real-time systems through coursework and projects.
- Gained practical skills in data structures, algorithms, system design, and software development practices.

Certifications & Awards

Full-Stack Generative & Agentic AI – Udemy	Jan 2026
GitHub Actions – The Complete Guide – Udemy	Aug 2025
20th Position & Public Voting Winner – Hack For Humanity 2025 – DevPost	Feb 2025
Web Development Course – NFTF	Jul 2023
