Summary

A developer at heart, building scalable, production-ready web applications from database design to the final user interface. Focused on clean architecture, strong performance, and working well with cross-functional teams to ship solid software.

Skills

Node.js • Express.js • Hono.js • Redis • MongoDB • PostgreSQL • BullMQ • React.js • Next.js • Tailwind CSS • JavaScript • TypeScript • Puppeteer • LangChain.js • Pinecone • Docker • AWS • OpenTelemetry • Grafana • Nginx • GitHub Actions • WebSockets • System Design

Professional Experience

Web Development Intern — HyperNeuron

Jun 2026 – Jul 2026 • 1.5 mo

Technologies: PostgreSQL • Express.js • React.js • Shadcn/ui • AWS • Docker

- Engineered a multi-tenant K-12 education platform capable of serving 10,000+ students, with capacity for 500+ concurrent users.
- Translated 30 of the 85 Figma designs into responsive, production-ready UI, resolving gaps where specs were incomplete.
- Directed database schema design and UI development, partnering with a 3-developer team to ship the platform end-to-end.
- Attended 6+ weekly client meetings to gather requirements and translate feedback into implementation changes.

Projects

Sleek AI — AI Chat Platform

Dec 2025 – Mar 2026 • 4 mo

Technologies: Hono.js • LangChain.js • PostgreSQL • BullMQ • Pinecone

- Architected a full-stack AI chat platform managing multi-model LLM pipelines and tool execution with LangChain.js.
- Built a long-term memory pipeline using LangChain.js to persist conversation history and enable context-aware AI responses.
- Implemented file processing with BullMQ workers, enabling scalable background task handling.
- Integrated Clerk for secure authentication and leveraged LangSmith to monitor AI pipeline performance.

CronJob Scheduler

Jul 2025 – Oct 2025 • 3 mo

Technologies: Agenda.js, QStash, Redux Toolkit, Docker, Zod

- Designed a scalable cron job scheduler using Agenda.js, enabling users to create, manage, and monitor scheduled tasks efficiently.
- Orchestrated CI/CD with Docker and Watchtower; enforced system monitoring using Grafana and Prometheus.
- Sustained 100+ scheduled jobs in continuous production operation for over a year, demonstrating long-term system stability at scale.
- Leveraged Redis for efficient caching and developed a PWA for consistent performance on all devices.

UniRide – Ride Pooling Website

Jan 2025 – Feb 2025 • 1 mo

Team: 3 members

Technologies: Node.js • MongoDB • Socket.IO • Tailwind CSS • EJS

- Delivered backend APIs and real-time WebSocket communication with Node.js, enabling seamless student ride sharing.
- Streamlined ride discovery, enabling efficient ride-sharing and reducing campus transport congestion.
- Engineered backend storage with MongoDB and designed a responsive UI using Tailwind CSS.
- Coordinated with team members to divide tasks, review code, and deliver the project within the hackathon timeline.

Education

Bachelor's in Software Engineering

Dec 2022 – Dec 2026 • 4 yrs

Mehran University of Engineering and Technology

CGPA: 3.74/4.00 • Jamshoro, Pakistan

- Focus: Software Engineering, Web Development, Database Systems, AI, System Design.
- Developed web applications and real-time systems through coursework and projects.
- Gained practical skills in data structures, algorithms, system design, and software development practices.

Certifications & Awards

Full-Stack Generative & Agentic AI – Udemy	Jan 2026
GitHub Actions – The Complete Guide – Udemy	Aug 2025
20th Position & Public Voting Winner – Hack For Humanity 2025 – DevPost	Feb 2025
Web Development Course – NFTP	Jul 2023
